## TREND TALK

### **MATERIALS AUTMN | WINTER 2023/24**

**Strong statements.**

**Coolness meets warmth, sheen meets matt, texture meets shimmer. The new materials for fall | winter 2023/24 play with contrasts and extremes.**

The new variety of materials in the next fall/winter season makes strong statements - to be seen at the upcoming ILM. In addition to the return to classicism and elegance with fine leathers and wool qualities and a glamorous increase in decoration, comfort and lightness are not left out. Technical materials, nylons and quilting finally enter into a liaison with naturalness and craftsmanship. Sensuality and self-confidence characterize the new materiality.

## CLARITY

Classicism and clarity. Glamour and glitz. Sartorial elements flirt with Modern Goth Romantic and decorative elements, studs and metallics. Minimalist investment pieces made of timeless leather stand for classicism and long-lasting sustainability at the same time. Business essentials combine with clean leisurewear. Clean surfaces and cool handles meet luxurious wool qualities, bouclés and finest nappa. Leather and velour, lacquer and metallics are softly broken up by melanges of wool and felt. Shine is back and shows up from silky satins and metallics to nylon and tech materials to sparkling sequins.

## GROWTH

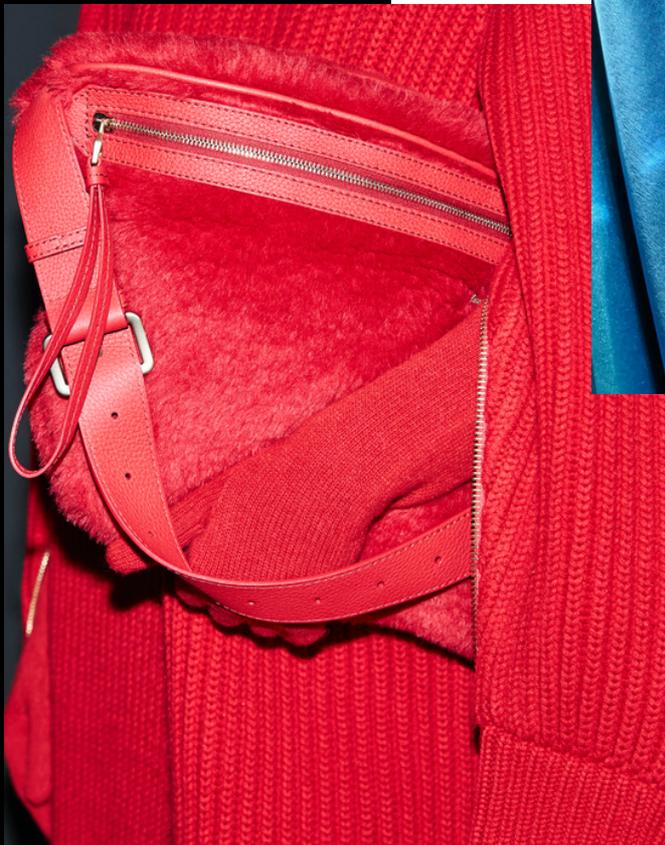

Nature as inspiration and provocation. Utility comfortwear is enhanced with graphically interpreted folkloric designs, wild forest prints and naive animal motifs. Denim and canvas meet washed leathers in vintage looks. Artisanal looks combine with prepped up ultralightweight fabrics. Braiding, graphic stitching and geometrically interpreted ethnic motifs create an exciting kaleidoscope of details and designs. Checks and Modern Quilting bring exciting narratives. Flannels and corduroys set traditional accents.

## ENERGY

Fun and color first! Feelgood color blocking and block stripes provide striking power moments. Iridescent rainbow effects, Unexpected Metallics and Bold Nylons enrich Ultrasoft Nappa, Croco Embossing and Highshine Lacquer. The result: a hybrid mash up of ecstatic gaming and pop art, fairytale fantasies, real-life avatars and NFT aesthetics. Surfaces are three-dimensional, experimental, and often overdone. Colored Mohair, Fantasy Knit and Fun Fur compete with the smooth surfaces for an extra dose of fluffyness.
